NEWS AND VIEWS . . .

And What Have You

By BOB CRAIG

You could almost hear the sigh of relief that went up in Hamlin Monday when Dr. Joe Don Hymer opened his medical practice here. Probably the loudest of these sounds of joy came from Dr. Smith.

All of us here at the Herald join all of the people of this area in welcoming Dr. Hymer and his family to Hamlin. It seems especially rewarding to have a home town boy come back to practice medicine here.

We really had hoped to announce Dr. Hymer's moving to Hamlin with a big black headline, but it just didn't seem to work out that way. He just quietly slipped into town and started to work.

We hope to have some pictures and a story on him and his family next week. Would have liked to have something this week but just did not have the heart to impose on someone trying to get moved and settled.

Some time back we ran a humorous article on what is a rancher and now there is one making the rounds on what is a farmer. This one tends to be a little more serious than the one on the ranchers.

What Is A Farmer?

Wives help them, little boys follow them, the Agriculture Department confuses them, salesmen detain them, meals wait for them, weather can delay them, but it takes Heaven to stop them.

When your car stalls along the way, a farmer is a considerate, courteous, inexpensive road service. When a farmer's wife suggests he buy a new suit, he can quote from memory every expense involved in operating the farm last year plus the added expenses he is certain will crop up this year. Or else he assumes the role of the indignant shopper, impressing upon everyone within earshot the pounds of pork he must produce in order to pay for a suit at today's prices.

A farmer is a paradox — he is an overalled executive with his home his office; a scientist using fertilizer attachments; a purchasing agent in an old straw hat; a personnel director with grease under his fingernails; a dietitian with a passion for alfalfa, aminos and antibiotics; a production expert faced with a surplus, and a manager battling a price-cost squeeze.

He manages more capital than most of the businessmen in town.

He likes sunshine, good food, State Fairs, dinner at noon, auctions, his neighbors, Saturday nights in town, his shirt collar unbuttoned and, above all, a good soaking rain in August.

He is not much for drouths, ditches, throughways, experts, weeds, the eight hour day, helping with housework or grasshoppers.

Nobody else is so far from the telephone or so close to God. Nobody else gets so much satisfaction out of modern plumbing, good weather and homemade ice cream. Nobody else has in his pockets at one time a three-bladed knife, check book, billfold, a pair of pliers and a combination memo book and general farm guide.

Nobody else can remove these things from his pockets and, on wash-day, have overlooked: 5 "Steeple," one cotter key, a rusty spike, 3 grains of corn, the stub end of a lead pencil, a square tap, a \$4.98 pocket watch and a cupful of chaff in each trouser cuff.

A farmer is both Faith and Fatalist—he must have faith to continually meet the challenges of his capacities amid an ever-present possibility that an act of God (a late spring, an early frost, tornado, flood, drought) can bring his business to a standstill. You can reduce his acreage but you can't restrain his ambition.

Might as well put up with him—he is

Any child who is 5-7 years of age is eligible to attend the public school kindergarten this year, according to Supt. Bob Hawes.

Other five-year-olds as of Sept. 1 who may not meet the above criteria may be eligible if, first, they are non-English speaking children or second a member of a family with yearly income of less than \$3,000.

Parents of prospective kindergarten students are reminded that they must comply with all rules of the state with regard to birth certificates and immunizations.

CAMPAIGN PLANNED—

Small Turnout For Clean-Up Meeting

Just over 20 people showed up for the Town Hall meeting called by the Hamlin Board of Community Development to make plans for a Clean-up Campaign for Hamlin.

Kenneth Hertel, BCD president, presided at the meeting and told those present that any clean-up campaign for the city would take at least a year. He said it took a long time for the city to get in this bad condition and we could not expect to clean it up overnight.

The group decided that the highways leading into the city should be the first place to start and the various civic and service clubs represented were assigned segments of these highways to survey.

The groups were asked to

survey their areas, mail letters to property owners whose property needs to be cleaned up and to follow up with additional contacts later.

The group voted to meet again Monday, Apr. 2, to check on the results of the surveys and to make plans for the annual clean-up campaign which is expected to be set for the last week in April.

Hertel told those present that it will take a great deal of volunteer labor and money if we

are to accomplish very much in the way of cleaning up Hamlin. He pointed out that there are a great many people who are either not physically or financially able to clean up their property.

During the discussion it was pointed out that the city will have to pass some new ordinances before some of the areas can be cleaned up and kept clean. Mayor Joe Ford told the group that the council would go to work on these ordinances as soon as possible.

Neinda Philosopher Comes Up With Answer to Basketball Recruiting

Editor's note: The Neinda Philosopher on his Johnson grass farm on Route One gets his mind off of world problems and on to sports this week, for a change.

Dear editor:

The trouble with most problems afflicting the human race is that people attack the problems backwards, sideways and every other way except straight on.

Take the problem of basketball. As I understand from reading the sports pages recently, recruiting of basketball players by the colleges is getting out of hand, in fact scandalous.

"You wouldn't believe what's going on," one prominent coach said when a bunch of colleges were being investigated for violating recruiting rules, like paying the players far more than the rules allow, giving them free automobiles, getting their parents cushy jobs, etc.

As it appears to me, basketball is now a game of height, and since the number of high school seniors who have reached a height of 6 feet 6 inches, or 6 feet 8 or in a few cases among the top-ranked teams 7 feet, is limited, naturally there's a wild scramble for them all over the country and it's no longer considered unusual for a boy say in New York to decide to get his higher education in California for example, although any other combination of states can be used. Tall boys

just seem to get a better education at distant schools.

College professors who set up the recruiting rules are thus fighting a losing battle, because when the demand exceeds the supply, the price jumps, whether it's basketball players or T-bone steaks.

The answer to the problem is simple. Instead of setting up more rules and hiring more people to enforce them, all you'd have to do is raise the

baskets four or five more feet.

A 7-foot boy would then have a lot less advantage over a boy 6-foot-6 or even just 6 feet.

If the recruiters come up with a 10-foot boy, raise the baskets still higher. I don't know anything about genetics but I don't believe they'd ever have to raise the baskets till they came out of the roof of the gym.

Yours faithfully,
J.A.

Put on the Full

Armour

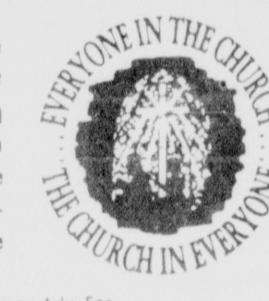

"Wherefore take unto you the whole armour of God" . . .

In Paul's letter to the Ephesians, he makes a comparison of the children of God and warriors. He says that our loins should be girt about with truth, and having on the breastplate of righteousness. He makes many more comparisons that exhort us to a proper life. Another thing that Paul urges is that we gather together and worship the Lord. No part of our armour is greater than regular church attendance. Much strength for the week is derived from worshiping with others.

Complete your suit of armour . . . attend church this week.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

Gary Cauble Elected ORU Alumni Officer

Gary W. Cauble, of Shawnee Mission, Kans., formerly of Hamlin, has been elected treasurer of the Alumni Association of Oral Roberts University. A 1971 graduate, Mr. Cauble was listed in "Who's Who Among Students in American Colleges and Universities" and awarded the Wall Street Student Achievement Award in 1971.

Cauble is now a marketing representative for the Kansas City Division of the John Shurtliff Co., with offices in Overland Park, Ks. He is also active in programs of the Institute of Church Renewal as a volunteer coordinator. He is the son of Mr. and Mrs. J. C. Cauble of Hamlin.

The cropland field received attention first. It was terraced and a grassed waterway was constructed to carry runoff from diversion terraces safely off the field. The diversions were constructed to intercept runoff from rangeland above the field.

Improvement of the rangeland was begun on the two pastures by aerial spraying the mesquite. First, one pasture, and then, the other was sprayed and deferred from grazing to allow native grasses to increase in number and in vigor. In later years much of the acreage in the two pastures was root-plowed and seeded to adapted grasses.

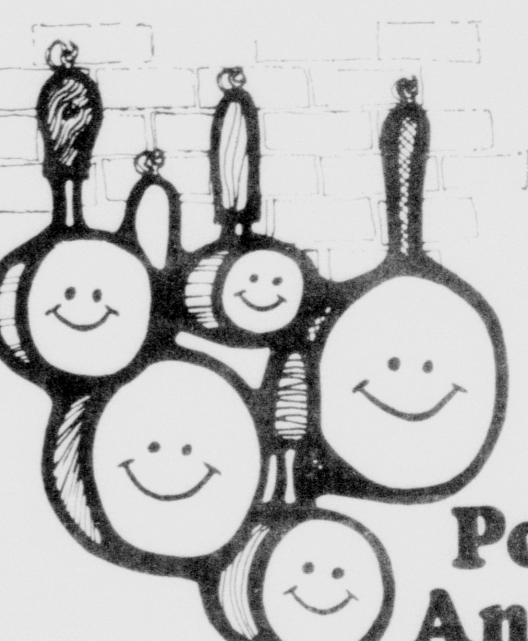

In 1964 Griggs purchased 640 acres that joined his land on the northeast corner. Already convinced that he could take unimproved land and economically improve it, he began to plan the steps he would have to take to accomplish this. An employee of the Soil Conservation Service assisted Griggs in developing a plan of operations that would result in a steady improvement of the rangeland and cropland.

Over the last several years, the rangeland has been aerial sprayed, chained, or rootplowed and seeded. Each succeeding growth of grass is managed so that it receives a period of rest each year and is not overgrazed. Approximately 730 acres of rangeland receive this type of management each year. Approximately 10,500 feet of cross fences were built and several ponds constructed to make the management of the rangeland more convenient and economical.

The cropland on the 640 acres has been parallel terraced in recent years. This provides an opportunity for increased grain and forage production because of better distribution of rainfall in the terrace intervals.

Improvements in the rangeland over the years has enabled Griggs to increase his carrying capacity by at least 40 percent. In reality, he could probably carry 12-15 more animal units and not do damage to the grass, but Griggs prefers to stock conservatively so that the vigor of the grass will be maintained and the soil will be protected against erosion.

The Directors of the Upper Clear Fork Soil and Water Conservation District encourage other landowners to develop and carry out conservation plans that lead to protection of the soil and to increased income.

Well, the senior athletes fell to the Faculty 47-50 Friday night. The boys were rather upset about some of the calls, but when they cooled off they remembered it was all in fun. Milton Jones was high scorer with 25 and Coach Bill Grissom with 15 for the Faculty. Referees were juniors Roy Scifres and George Titus.

The track team made a fine showing at the first meet of the season at Winters Saturday and came in second with 101 points under Brady's 109 points. Our

boys won the 100, 200, sprint relay, mile relay and long jump. They also placed in the other events. This weekend 8 boys will travel to Andrews and 15 will travel to Anson. Good luck Pipers!

by Mrs. R. M. Babb

A very typical March day, wind and flying clouds and promise of, guess what rain.

Just learned that Vanesa Hardwick won first place in her art of making a main dish in district meet in Childress Saturday. Darlene Herron won a blue ribbon. Mr. and Mrs. Chub Hardwick and Mr. and Mrs. Roy Herron accompanied the girls to the meet Saturday.

Last week the same girls won at the meet in Roby, also winning blue ribbons were Janna Jennings and Nereesa Hardwick, but they are too young to compete in District.

Richard Allred visited with his grandmother recently. He is living out near Big Spring.

Mr. and Mrs. L. T. Watson drove to Dallas weekend last to be with her brother while her sister-in-law had open heart surgery. She is doing nicely.

Mrs. Elsa Moffett and Bill are visiting in Ulysses, Ks. and enjoying Elsa's new grand baby.

The community enjoyed the monthly supper at the Baptist

Church last Wednesday night.

Mr. and Mrs. Leon Gardener, Rebecca and Beverly Johnson of Odessa and Riley Cross of Abilene visited in the Rex Cross home over the weekend.

Mr. and Mrs. Buford Brown were in Temple over the weekend.

Milo Gray told me this morning that Pauline is out of the hospital but having to go each day for therapy.

Mr. and Mrs. Buster Lambert drove to Oklahoma again this weekend. Her brother is very ill.

Edgar Smith has recently had surgery at Hendrick's in Abilene.

Mr. and Mrs. L. T. Watson spent the weekend visiting friends in San Angelo.

Mr. and Mrs. William Stevens and family of Odessa visited in the Hugh Hood home over last weekend.

Sounds good to hear the gin humming. Maybe some will get their cotton out before it starts raining again.

BEEN ON A TRIP? That's news call the Herald.

Hair-raising experience: taking off a turtleneck sweater.

Friend of ours is so nearsighted, he needs contact lenses just to find his glasses.

It's flattering when someone remembers your name, especially if it turns out he's not trying to sell you anything.

Even in the old days, they had something to make you sleep. They called it "work."

Due to our low prices and high trade in policy, we have too many used TV's. If you want a bargain in a used color or black and white T.V. now is the time at FRANK'S T.V.
